Operating Environment

Jungheinrich warehouse products feature assistance systems and options to enhance the operation of your warehouse.

Automated Guided Vehicles (AGVs)

Reduce the possibility for error while optimizing productivity with more accurate operation through semi-automation or full-automation solutions.

Object Detection System

Equipped on our AGV solutions, is designed to avoid collisions with pedestrians, trucks or other obstacles in your warehouse with the use of built-in, enhanced presence sensors.

Backup Alarm / "Smart" Back-up Alarm

Warns pedestrians of a truck traveling in reverse. The "smart" alarm adjusts its volume depending on the ambient noise that might interfere with anyone's ability to hear the alarm.

Enhanced Visibility Options

There are a number of available options to increase operator visibility, including mirror packages and back-up cameras, that can be used to further enhance the visibility features built into our trucks.

Light Packages

Whether illuminating the travel path or making other personnel aware of a truck's presence, our trucks can be equipped with amber strobes, spotlights and other light packages to help increase awareness.
