

Ergonomics: efficient operating concept for more freedom of movement, with electrically adjustable control panel

Intelligence: truck tracking and behavior control via RFID technology for simple system integration

Energy Efficiency: run up to two shifts on one battery charge

Flexibility: versatile design with modular construction and optional performance and assistance packages

Technology-leading: semi-automated position approach with exclusive Warehouse Navigation System

Lithium-Ion available (excludes EKX 514)

EKX 410/412/514/516k/516

Man-Up Turret Truck (2,200 - 3,500 lbs.)

Global leader

The Jungheinrich® EKX series of turret trucks has been the global industry benchmark for years. Now with the introduction of maintenance-free synchronous AC motors, the standard for higher performance has been raised - all while further reducing energy loss by as much as 10 percent.

Since 2007, Jungheinrich systems trucks have used RFID transponder technology to track and control the behavior of turret trucks in the very narrow aisle. In addition, our exclusive Warehouse Navigation System uses this technology for fast, efficient and precise approach to pallet locations. Wasted travel, adjustments and back-tracking can be eliminated. The productivity gains are up to 25% in most applications. And even if requirements change in the future, the system remains flexible and can easily adapt to expansions and changing demands.

High energy efficiency

Jungheinrich's energy-efficient design allows the 80-Volt EKX series to run up to two shifts on one battery charge. Additionally, several EKX models also qualify under the two shifts/one battery charge guarantee program*. The advantages: no interim charging, no battery changing and no additional charging equipment needed.

Flexibility for your business

Our modular performance and assistance packages ensure the EKX is specifically optimized for your unique application. The new Floor Pro option provides hydraulic vibration dampening over uneven floors for improved efficiency and performance. The sideshiftPLUS option helps facilitate load handling in different aisle widths and saves time, while allowing the EKX to work effectively in very narrow aisles.

Operator Comfort

The operator compartment offers plenty of space and storage for the operator, while a foldable seat and electrically adjustable control panel allow for comfortable standing or seated operation. The large front barrier window provides an excellent view of the forks allowing the operator to easily confirm proper load engagement.

**JUNGHEINRICH®**

In accordance with VDI Guideline 2198 this specification sheet provides details of the standard truck only.

Non-standard tires, different masts, optional equipment, etc. may result in different values.

1) with Speed Profile Plus, standard: (78.7 fpm / 78.7 fpm) / (0.4 mps / 0.4 mps)

2) with Lift Plus, standard: (98.4 fpm / 98.4 fpm) / (0.5 mps / 0.5 mps)

3) for minimum and maximum weights, (+/- 5%)

• Truck model, available mast

Center operation control
(standard on all EKX 4 and 5 series configurations)

Split operation control
(optional on all EKX 4 and 5 series configuration,
but not compatible with freezer package on
any model)

Freezer preparation with heated cab
(optional with EKX 514, 516k and 516)

The Jungheinrich Advantage

Standard values for working aisle widths													
Pallet size (L x W)		Stacking-in depth		Clear aisle width (Ast)		Transfer aisle (Ast ₁) theoretical						Transfer aisle (Ast ₁)* practical	
With rail guidance						EKX 410/412/514		EKX 516k		EKX 516			
in	mm	in	mm	in	mm	in	mm	in	mm	in	mm	in	mm
48 x 40	1,219 x 1,016	48	1,219	66.5	1,689	142.8	3,627	146.7	3,726	158.4	4,023	+19.7	+500
48 x 48	1,219 x 1,219	48	1,219	66.5	1,689	156.3	3,967	160.9	4,087	172.5	4,382	+19.7	+500
With wire guidance						EKX 410/412/514		EKX 516k		EKX 516			
48 x 40	1,219 x 1,016	48	1,219	68.5	1,740	151.7	3,853	163.5	4,153	175.2	4,450	+39.4	+1,000
48 x 48	1,219 x 1,219	48	1,219	68.5	1,740	166.9	4,239	170.9	4,341	182.5	4,636	+39.4	+1,000

*The practical transfer aisle width is a reference value.
 Note: (Ast) refers to the clear working aisle. (Ast₁) refers to the transfer aisle.

The Jungheinrich Advantage

Ergonomics

- Padded knee supports for comfort while order picking.
- Comfortable sitting or standing operation due to the spring-loaded, adjustable and foldable seat.
- Large LCD color display with all important information at a glance. High flexibility through softkey control.
- Comfort package with bright LED work lights and dual operator fans.
- Electronic power steering for easy, precise maneuvering.
- Modular storage systems (optional).

Productivity

- Simultaneous functionality of main and auxiliary masts saves time for greater productivity.
- Crane arm with auxiliary mast for additional 70" lift.
- Electromagnetic spring-loaded brakes on EKK 5-series load and drive wheels.
- Diagonal drive with direction and height-dependent speed profiles for maximum productivity.
- Jungheinrich curveCONTROL for calculated speed reduction while steering into curves outside the aisle.

Intelligent Systems

- RFID technology for tracking and controlling truck behavior in the very narrow aisle (optional).
- Wire guidance with multi-frequency control (optional).
- Warehouse Navigation System with precise location approach and automatic stacking procedure (optional).

Commissioning And Maintenance

- Quick and reliable commissioning through teach-in process.
- The integrated diagnostic system allows for fast and accurate fault diagnosis.
- 1,000 hour service intervals lower maintenance costs and provide greater reliability.
- Maintenance-free synchronous AC motors and wear-free sensor systems ensure high operational reliability.

Flexibility

- Multiple optional performance packages to meet application and throughput demands.
- Available assistance systems for improved processing and easier pallet handling.
- CAN-Bus system for reliable data transfer and high flexibility.

High Energy Efficiency

- Exclusive synchronous AC motor technology reduces energy losses and allows even longer operating times.
- Dual energy recovery during braking and lowering via patented hydraulic valve technology.
- Reduced energy consumption from compact hydraulic system with short transmit distances and less resistance.
- Compact electronics mean less cables and connectors, and tuning of all components to one another.
- Active battery and energy management reduces the current peaks and conserves the battery and components.
- High performance allows up to two shifts on a single battery charge on 514/516k/516 models.

Assistance Systems (optional)

- Jungheinrich warehouseNAVIGATION for semi-automated location approach.
- Jungheinrich Logistics Interface middleware for easy connection to any existing WMS.
- Stack-by-Light spotlights for directional-assisted stacking.
- Pick-by-Light spotlights for directional-assisted order picking.
- operationCONTROL for load weight indication on the display and warning signal if parameterized weight is exceeded.
- positionCONTROL for height pre-selection.
- Floor Spots as visual warning signals for pedestrians - available in both directions.

warehouseNAVIGATION System (Optional)

- Up to 25% higher throughput efficiency in the very narrow aisle warehouse.
- Simple connection of the EKK to the customer Warehouse Management System (WMS) via the Logistics Interface middleware.
- Automatic horizontal and vertical positioning within +/- 2mm accuracy.
- Automatic stacking and retrieval operation.
- Automatic confirmations back to the WMS eliminate manual scanning for process reliability and time savings.
- High flexibility to accommodate future warehouse expansion.

Performance Packages

- liftPLUS for increased lifting speeds.
- speedprofilePLUS for weight-based optimization of traverse speed.
- Residual capacityPLUS for increasing residual capacities.
- Floor Pro system for hydraulic vibration dampening on uneven floors.
- sideshiftPLUS for up to 4" additional shift on each side.

Optional Features

- Freezer preparation with heated cabin for optimal operator comfort and productivity in freezing environments (optional with EKK 514, 516k and 516)
- Split operation control at seat armrests provides an alternative solution to the standard single piece centered operation control console (not compatible with freezer package on any EKK model).
- Synchronized swiveling and traversing of the forks (automatic process).
- Modular storage systems.
- Wire or rail guidance for efficient control.
- Auxiliary mast with higher additional lift.
- Symmetrical fork positioner to accommodate different size pallets and load widths.
- Asymmetrical fork positioner for adaptation to load size and sideshift for comfortable order picking.
- Jungheinrich radio data terminals with electrical interfaces for WMS.
- Jungheinrich barcode scanner and holder with multiple mounting positions.
- Easy Access Entry System via soft key, PIN code or transponder.

Lithium-ion Package Advantages (Not available on the EKK 514)

- Fast charging with no need for battery exchanges
- Maintenance-free with no odors from gases or acidification
- Longer service life and lower maintenance compared with lead-acid batteries
- Charging can be interrupted at anytime
- 5-year battery warranty included

Parts when you need them

Jungheinrich's Parts Fast or Parts Free Guarantee ensures next-business-day delivery by 5:00 PM of all Jungheinrich parts in the United States, or they're free, including freight. For customers in Canada and Mexico, the guarantee ensures shipping of parts within 24 hours from the time the order was placed by the dealer. See your local Jungheinrich dealer for program details.

* Programs may be subject to change without notice and may vary by region. Please ask your local Jungheinrich dealer for complete terms and conditions.
